Lancaster Farming

VOL. 8—NO. 9 | Lancaster Farming, Saturday, February 2, 1963 | $2 Per Year

REPAIR AND PAINTING OF TRACTORS and other farm machinery constitutes a large portion of the winter shop program at Manheim Central High School. Vernon Martin, Lititz R2, left; brought the tractor into the shop for reconditioning. Helping Martin with the work are, left to right, John Wagner, Manheim R1; James Hess, Manheim R1; Glenn Metzler, Manheim R2, and Lee Hershey, Manheim R4. All the boys are seniors in the vocational agriculture course at the school. L. F. Photo

Complete Water Study Set By County Planners

Lancaster County Commissioners announced today that they have earmarked $10,000 in the proposed General Fund Budget for 1963 towards the initiation of a Comprehensive Water Resources Study for Lancaster County

Commissioner C Abram Snyder said, "The findings and recommendations of the Water Resources Advisory Committee of the Lancaster County Planning Commission and the many comments made to the Commissioners by citizens and local officials indicated to us the definite need for such a study The Commissioners were much impressed by the well attended meeting in Ephrata on January 17th which indicated the growing concern for water and the County-wide interest"

"We take note of the fact that the County Soil Conservation District has passed a resolution supporting such a study and the Conestoga Valley Association has shown a continuing concern over the years in our increasing water problems"

The study as proposed by the Water Resources Advisory Committee would be multi-purpose in scope It would take into consideration the water needs for agricultural, domestic, Industrial, and recreational uses

Meeting with the County Commissioners to report on the water resources meeting in Ephrata were Carl W Fuehrer, Borough Manager of Ephrata and organizer of the public officials meeting, Amos H. Funk of Millersville member of the Water Resources Commission and President of both the State and County Soil Conservation Districts, John H Kitch, Presi-

Amos Funk Is Featured Speaker At Vegetable Growers Meet

Amos Funk, Millersville R1, was one of the featured speakers this week at the two day educational conference of the Pennsylvania Vegetable Growers Association at the Pennsylvania State University.

Vegetable growers and canners' fieldmen from all over the state, who braved snow, wind and sub-zero weather to attend the annual conference heard Funk say timing irrigation of celery fields can not only increase yields, but can help protect the crop from frost damage.

Funk, a well known vegetable grower and conservationist, said, a field irrigated before an expected frost can protect the crop from damage despite a 28 degree temperature.

He said solar heat absorbed by irrigated soil is released at night and raises the temperature around a plant enough to protect it from temperatures four degrees below the freezing point.

Effectiveness of the control can be increased, he said, by irrigating immediately following transplanting and just prior to weed control spraying.

Weeds were controlled effectively in the Funk plots by spraying with five quarts of Vegetex as soon as a tractor can go through a field which was irrigated after planting.

Funk said a crop can be expected to use 0 6 inch of water a week in May, an inch a week

Manheim Future Farmers Study Machinery Care

Future Farmers of America believe in being prepared when spring planting season rolls around.

In preparation for the spring season, vocational agriculture students at Manheim Central High School are busy reconditioning and painting tractors and other farm machinery in the school shop.

Under the direction of Joseph H. McGahen, teacher of vocational agriculture, the senior class has undertaken a series of lessons on tractor maintenance in the school agriculture shop.

McGahen says, "we do not encourage major overhauls of tractors, but stress preventive maintenance such as adjusting carburetors, cleaning spark plugs, servicing the air cleaner system and the battery system.

Beginning with the general principles of the operation of internal combustion engines, the class has studied, with actual service to tractors brought in by the boys, care of the air cleaning system, the cooling

Farm Calendar

Feb. 4 — 12 noon — Pennsylvania Egg Industry promotion campaign kickoff luncheon in the Hotel Harrisburger.

Feb. 5 — 4 30 p.m. — Meeting of the Lancaster County Teachers of Vocational Agriculture at Penn Manor High School.

7.15 p.m. — New Holland Young Farmers meeting at the high school. Subject — Dynamometer testing of tractors.

Feb. 7 — 8 p m. — Solanco Young Farmer class meets in Solanco High School, Quarryville. Third in a series of classes on Farmers' Personnel Problems.

Feb. 8 — 8 p.m. — 18th annual stockholders meeting of the Lancaster County Tobacco Growers Cooperative at Farm Bureau Building, Dillerville Road, Lancaster.

Richard Wenner Is ASC Head

D. Richard Wenner, Harrisburg, has been appointed to the post of executive director of the Pennsylvania State Agricultural Stabilization and Conservation Service, it was announced this week.

In announcing the appointment, Howard R Porter, chairman of the state ASC committee, said Wenner will replace Harry A. Peters, Scotland, who has been appointed northeast area director for ASCS in Washington, D.C.

In his new post, Wenner will be responsible for administration of such farm programs as allotments, marketing quotas, price supports, feed grain and wheat stabilization programs, farm storage facility loans, and the agricultural conservation program.

He will resign the post of deputy Secretary of Agriculture of Pennsylvania to accept the new post.

Jack Grey Is Named Deputy Agri. Secretary

HARRISBURG — Appointment of Jack R. Grey, 42, York, as Deputy State Secretary of Agriculture, was announced this week by Gov William W. Scranton. Grey's appointment becomes effective February 1 He will have charge of program as the department's No. 2 man under Secretary Leland H. Bull. He will receive $16,127 annually

A native of Winburne, Clearfield County, Grey has been identified with Pennsylvania agriculture nearly all of his adult life. Since 1954 he has been with the Pennsylvania Canners Association, for the last three years as President and prior to that as Executive Secretary

During World War II he served from 1943 to 1946 with the U. S Army in Europe as tank platoon leader and administrations officer. He held the rank of First Lieutenant.

Grey has been active in a

Two Countians Re-elected By State Ass'n

The Pennsylvania Vegetable Growers Association this week reelected two countians to offices in the organization.

Paul Rowe, Strasburg R1, will serve his second consecutive term as president of the state association, and Rudy O Grob 2063 Stone Mill Road was named to his fourth term as secretary.

In the election, held in conjunction with the annual meeting at the Pennsylvania State

(Continued on Page 16)

CVA Elects Funk President

Amos Funk, Millersville R1, Thursday night was elected president of the Conestoga Valley Association, a post he held for five years prior to the election of John Kitch in 1961. Kitch served as president for two years.

Funk, president of the state association of Soil Conservation District Directors, is also chairman of the Lancaster County Soil Conservation District.

The association also elected Harry Althouse, Denver, secretary, succeeding Benjamin M.

(Continued on Page 12)

FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average near the normal range of 24 at night to 39 in the afternoon. The weather is expected to turn somewhat colder Sunday and Monday, and moderate again towards the end of the period. Precipitation will probably total less than 0.1 inch (melted) falling as light drizzle near the beginning of the period.

THREE-BOTTOM SPINNER PLOW for D-17 Power

Now you can have the performance of an Allis-Chalmers 80-Series plow in a big 3-bottom spinner model designed specifically for the Allis-Chalmers D-17 Tractor. This new, deep-working plow is designed for depths down to 14 inches. It is available with special deep-plowing bottoms. Plow is revolved at the end of a new vane-type hydraulic activator. Plow rotates on bronze *bushings*. Rear gauge wheel automatically positions itself for both right- and left-hand bottoms. Furrow gauge wheels control depth of front bottoms Plow is available either with SNAP-COUPLER hitch or category two 3-point hitch. Bottoms are protected by shear bolt action or by optional spring-trip beams. A similar 2 bottom spinner model is available for D-15 Tractors.

SNAP COUPLER is an Allis Chalmers trademark.

LANCASTER POULTRY CENTER

Price Gains Half Cent

Broiler prices continued a steady climb this week at the Lancaster Poultry Center as prices averaged more than a half cent above the previous week.

Volume dropped to only 20,000 head of broilers as all lots on offer were sold. Prices ranged from 17.0 to 18.9 for an average of 17 43 compared to the 16 88 last week.

One lot of 1,200 roasters made 21.2 and, five lots of 9,000 pullets brought 21.1 to 27.0. A lot of 7,000 leghorn fowl sold for 10.4.

The complete January 31 auction offered and sold 37,200 head in 14 lots.

Following is the complete sale report with lot number, grower in parenthesis, amount and breed, age in weeks and days, buyer and price.

CODE: WV - white vantress; P - pullets; C - cockerels; IRX - indian river cross; L-F leghorn fowl; SXP - silver cross pullets.

County FFA Installs

County Future Farmers this week installed a slate of officers at a meeting in Lampeter-Strasburg High School.

The officers were elected in a November 26 meeting, but installation was held up for 2 months when a controversy arose over the eligibility of one of the elected officers.

Donald Kraybill, Elverson R2, was named president, but after the election, it was learned that Kraybill had left Lampeter-Strasburg High School at the end of the 1961-62 term and enrolled at Lancaster Mennonite School last fall.

The National Future Farmers of America office in Washington D C. ruled Kraybill ineligible to hold office Garden Spot Chapter advisor, George Myers had contended that Kraybill had quit school and was therefore eligible under the national constitution

A second point of difference arose over the proper method of replacing Kraybill. Myers contended that another election should be held in order that each chapter in the county have an officer in the ruling body.

This week, the county association unanimously voted to invoke the presidential ascendary rule and move the first vice president up to the top post, the second vice president up to vice president, and leave the second vice president spot open.

Officers installed at this week's meeting were Kenneth Martin, Denver R1, president, Glenn Esbenshade, Pequea Valley FFA, first vice president, Carl Ginder, Witness Oak FFA, recording secretary, Willis Hackman, Elizabethtown FFA, corresponding secretary, Jay Mylin, Penn Manor FFA, treasurer, R. Edwin Harnish, Solanco FFA, reporter; Fred Hess, Warwick FFA, sentinel, Ray Kline, Cloister FFA, chaplain, and Gerald Waltz, Manheim FFA, parliamentarian.

Prices Down; Demand Fair

Live broiler prices declined approximately a quarter of a cent a pound in Delmarva during the 24 hour period ending 10 30 a m Friday A fair demand took the light offerings

At farm prices ranged from 16 1 to 18 0 for 775,500 head including 392,500 head sold at Thursday's auction at the Eastern Shore Poultry Growers Exchange

Ready to cook demand was spotty ranging from slow to fair. Estimated slaughter for the weekend by Eastern Shore processors was 643,000 head compared to the 751,000 head last weekend Very few processors planned to operate today.

The Delmarva broiler-feed ratio for the week ending January 25 was up two points from the previous week at 3 3 Broilers averaged 15 99 during the week and 20 per cent mash cost the grower $98 46 per ton. The ratio for the comparable week a year ago was 4.2 when broilers averaged 19 60 and mash cost $93.94 per ton

Georgia reported sales of 55,900 head at the Georgia Poultry Growers Exchange Prices ranged 16 1 to 16 6 with an average of 16 35 Estimated slaughter by Georgia processors for the weekend was 1,604,000 head compared to the 1,765,000 head last weekend

Eastern States Farmers' Exchange

A farmer-owned cooperative

Headquarters: West Springfield, Massachusetts

From Where We Stand . . .

The Strength Of The Pack Is The Wolf

And the farmer waited!

Tobacco buyers hit the road with contracts in their pockets and the farmers looked forward to the offered price with a great deal of expectation. The first offers, while not high enough to make any over-night millionaires, were pretty attractive.

But the honeymoon was over before it got started, and most of the contracts stayed in the pockets of the buyers. As soon as a few crops were sold, buying activity slacked off and finally came to a virtual standstill, with over half the tobacco still in the hands of the grower.

With the purchase of a few crops, the companies began to drop prices slowly till now the offered bid is barely enough to pay the cost of producing the crop

Now, almost three weeks after the buying season opened, nearly half of 31,000 acre crop is still in the hands of farmers, and many of them are beginning to wonder if they are even going to see a tobacco buyer.

With spring planting season approaching and farmers in need of cash, more and more of them will be anxious to sell at whatever price is offered. Could this be the situation the tobacco companies are hoping will develop? Are farmers always going to have to take whatever price the buyer offers? Will farmers ever have any part in helping to establish the selling price of his produce or will he always be content to wait—and wait—and wait—and then take whatever he can get.

He will have to go on taking whatever is offered as long as the buying power is centered in the hands of a few, and the sellers remain a large group of scattered, unorganized individuals.

Rudyard Kipling, the great English poet once said, "The strength of the pack is the wolf, and the strength of the wolf is the pack."

So long as farmers are content to be lone wolves, the strength of the pack is vulnerable, and when the pack can not withstand attacks, the wolf dies. Unless farmers are willing to regulate their own production and stick together for mutual benefit, they will have a losing struggle in the market place.

At least that's how it looks from where we stand.

Seedsmen See Shortages Of Clover and Alfalfa

HAROLD MENGLE
Eastern States Farmers Exchange

Alfalfa and red clover will be in short supply this year. Many of the growers have found that they can make a little more profit on other crops, such as cotton.

Whether this will affect the future of the seed business is hard to tell It looks like we will have to find a way to make it a little more profitable for the growers to produce this seed.

Several other factors entered into the picture this year A shortage of water resulted in a shortage of irrigation, and a shortage of seed produced in

HAROLD MENGLE

some areas there is a shortage of good pollinating bees This seems peculiar, but I understand it is a problem in some areas This, along with increased population of injurious insects adds to the problem

Only about half the normal acreage was planted to Pennscott clover seed last year Part of this is due to competition from other varieties, especially Chesapeake I don't expect too much of a problem with Pennscott in spite of the shortage — the demand has gone down. However, our supply of Chesapeake is exhausted.

Some of the other seeds in short supply include Alsike and White Dutch clovers, Smooth Broome, and Timothy.

Alsike is in the shortest supply of record while the supply of white clover is down slightly from normal. Smooth Broome is in very short supply. Timothy is short, especially the later maturing varieties Our Seed Service was canvassing our growers and just could not find good seed They found some poor seed, particularly seed with a large amount of weed seed, but hardly any we could use.

It is becoming increasingly for farmers to pay attention to the Penn State Drill Box Surveys Some of the reports they have brought out are shocking, but the situation is just about as bad as they indicate Too many farmers are using poor quality seed because it is a low cost production item compared to some other things. Farmers just don't pay as much attention to the selection of good seed as they should.

I do not believe the farmers will gain a thing by waiting to order seed In fact, if he waits till summer to order his seed for fall planting, the farmer could hurt, and hurt bad Just this week we got a seed price list and several items have advanced.

The seed supply of the summer annuals (sudan grass, sorghums and the Sudan-sorghum crosses) will be about like the alfalfas and grasses — the supply is somewhat short We have had the greatest interest we have ever experienced in these lines, because of the drought last summer.

One of the most adaptable, most versatile, most drought-resistant grasses for Lancaster county is Reed's Canary Grass. It can be seeded alone or in mixtures with Ladino or alfalfa as it associates well with either. Reed's canary is a rank grower and will produce lots of feed, but it must be managed properly It must be well fertilized — by that, I mean a balanced fertilizer program. It should not be allowed to mature beyond the bud stage, it should be grazed hard and clipped close, but if you take care of it, it will produce lots of forage in this area.

Our supply of seed corn is very good We are short of a few hybrids, but this is not unusual It would compare favorably with other years.

Devotional Reading: John 14 12-20.

Power

Lesson for February 3, 1963

POWER is always fascinating. A champion boxer or swimmer, a Palmer or Niklaus driving down a long fairway, Niagara Falls seen from below, a severe electrical storm, a hurricane,—or the power of influence, of ambition, of fear . . . No kind of power is dull. Those who have it, or control it, seem awed by it themselves; and those of us who have little power are afraid lest power of storm or brute force of brutal men be turned against us. But whenever that word Power strikes the ear or eye, one of three words—or all of them—come to the mind at once, as a kind of question Power —we think; power for—? power over—? power by—?

Dr. Foreman

Power over . . .

The four pictures of Jesus in the four Gospels are each one different from the others. Mark's picture is one of the Divine Man of Power. Christ's ideas interested Mark less than His mighty deeds. For Mark, Jesus spoke by action quite as much as by words. Mark's Gospel gives an amazing answer to the question: What did Jesus have power over? Everything, Mark says in effect. Even storms; even death. Things out of this world, like demons, or things in this world, like fever,—Jesus controlled them all. This is so astounding that there have always ben persons who boggle at it. There must be some exaggeration here, they think, or some imagination running wild. However, let us take it for granted that Mark was telling the truth, wild as it seemed to be then and now. What he affirms is miracle, no less. Men today have some power over fever, storms, madness and death, but they do not claim miracles. The miraculous feature of Jesus' miracles was that He didn't do anything, He didn't use anything, He just willed (with or without words) that something happen, or cease to happen, —and on the instant, so it was. The whole point of a miracle is not that it is unique or astonishing. The point is, it is not what would happen if nature were left to itself. The doctor giving antibiotics for infection may be using "miracle drugs" but the drugs are not really miraculous, they are as much a part of nature as the germs are. Jesus' will is superior to nature. Jesus commands nature to be un-natural; and it is done.

Power for . . .

There is more to be said. The power of nature seems at times to have no purpose. We talk about an "angry sea," a "bitter wind," but the sea is not angry, and the bitterness of the wind is nothing compared to bitterness in the heart. The sea just smashes and passes on, the wind would as soon freeze a baby as an escaped convict. Nature has no purposes, or if she does she is not aware of them. But all Jesus did—whether we call it miracle or not—was purposeful. Now the purposes of ordinary men may be strong, but they are not always good and they are never completely wise. The purpose of Jesus in nearly every act of power He performed was clear.

Power by . . .

During Jesus' lifetime, we are told, people asked one another: Who then is this? Mark has already introduced Jesus to his readers: this is the good news about Jesus Christ, the Son of God. This is power exerted by one who is so Godlike that He can be called the Son of God. And this is why (as Christians believe) only a few persons in the long history of the world, and then only for a few moments in all their lifetime, have been permitted to share the divine power that Jesus had. H G. Wells wrote a story called "The Man Who Could Work Miracles," and any one who reads that charming and funny-tragic story will see why it is that it is a very good thing for the world that miracles (mostly) don't happen. Miracles are safe only when the power that wills them is wielded by one who shares the knowledge and the wisdom and the love of the infinite God. It may become terribly clear to a few survivors, if any, of a nuclear war, that ultimate power, used by angry or ambitious men or nations, may turn miracle into murder.

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

To Order Legume Seeds

Broadcast seedings of clover or alfalfa should be made during late February or early March; this is only a month away. Reports indicate some scarcity of quality legume seeds. If needs are not already on hand, we suggest prompt attention to this important seed purchase.

To Kill Lice On Livestock

Lice infestation seems rather heavy this winter in many herds of cattle and hogs; cold weather has grown a very heavy hair coat which makes it more difficult to do a thorough job of treatment. Dusts containing either lindane or rotenone may be used on cattle and DDT or Lindane on hogs. Treat at least 30 days prior to slaughter. Repeat treatment in 12 to 14 days.

To Use Hay Racks

The feeding of hay on the ground or on the flour of pens is a poor practice because much of the forage is wasted; also, parasite eggs may be consumed from this material. With the high cost of hay and forage this winter growers are urged to eliminate all possible waste through poor feeding methods and equipment.

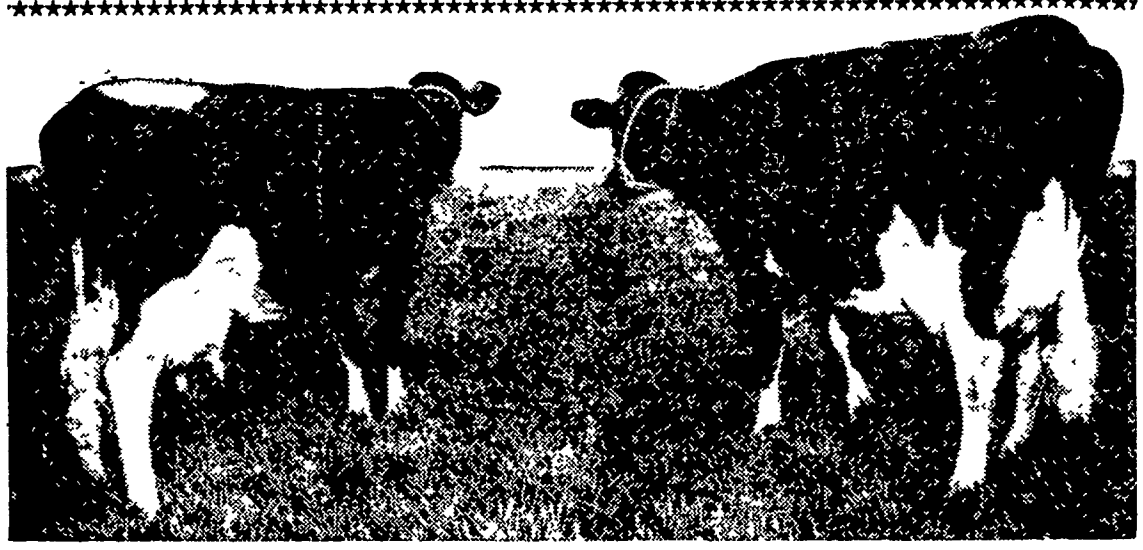
To Use Farm Crop Records

In order to properly keep account of the needs and treatment for each field on the farm system of field accounts is recommended. These crop record sheets are available from our Extension office (one for each field or strip) in which case an accurate record may be kept. This is especially true where soil tests are being made regularly.

CHECKERBOARD

service bulletin

Which is the better cow?



YOU BE THE JUDGE!

These two cows are from the Purina Dairy Center herd. They're about the same age. Each has calves regularly. Each has produced 15,000 lbs. of milk in her 10 months lactation.

THE COW ON THE LEFT should be the heavier producer, based on her bred-in ability. But she's too thin (because of the experiment she's been on). She's been producing at the expense of her own body.

Body condition is most important in keeping a herd milking at their peak year after year. Body condition depends on proper feeding during the dry period . . . and is maintained by feeding a good milking ration.

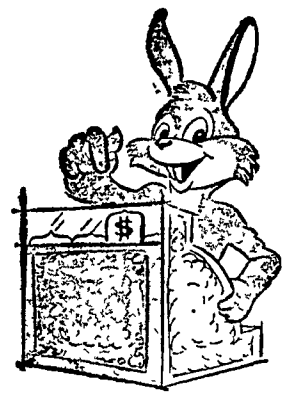
Ask us about Purina's Dairy Feeding Program . . . built by 34 years of research with thousands of cows. It's sure to help your cows give all the milk they're bred to give . . . to help you make top profits from your herd.

Rabbits Go Commercial

American housewives love variety in the meat counter at their supermarket and they'll pay for it, too!

The growing demand for delicious farm-raised, all-white rabbit meat creates a new commercial farm opportunity. Rabbit production, "The Purina Way" may be a sound, profitable (but not get-rich-quick) business, either part-time in the backyard or full-time on the farm.

Talk with your Purina salesman about this opportunity. If you raise rabbits now . . . feed Purina Rabbit Chow, developed at the modern 84-doe rabbitry on the Purina Research Farm, Gray Summit, Missouri.



Do You Know . . . Sows Produce 100 Gallons Of Milk Each Year

A brood sow is a factory — a "pig factory" — and she needs help to produce to capacity.

At the Purina Research Farm on the Purina Hog Program, sows each year produce more than 100 gallons of milk; wean 18 pigs; and maintain their own bodies. These are mighty big jobs.

Purina Sow Chow — fed with your grain — is designed and researched especially for these big jobs. Get Sow Chow at our store with the Checkerboard Sign.

● Seedsmen

(Continued from Page 4)

at the first of the year Alfalfa seed is getting even tighter than it was at that time Clover tightened up somewhat too because of the high buying movement of alfalfa, and I also understand there was some export Japan made a purchase of some 4 million pounds of clover seed from Canada, and the U S and Canada trade back and forth

There seems to be plenty of grass around There was an exceptionally good crop of ryegrass seed, but in spite of the big supply, ryegrass seed has advanced almost $2 00 per hundredweight in the past two weeks

I think farmers would be wise to use more cover crops Penn State tells us that Lancaster County has a lower organic matter content in its soils than any other county

There is very little good germinating timothy around There is some poor quality timothy on the market, but in general, the grass seed situation looks pretty good

● Amos Funk

(Continued from Page 1)

in June, 1½ inches in July, 1 6 inches in August, 1 4 inches in September and 0 9 inch in October He said a rule of thumb in irrigating is to apply an inch of water a week when rainfall is less than an inch

An inch of water applied to tasseling corn can double yields, compared with a field that has been irrigated a full season, Funk said, In this case, timing of the irrigation is at the critical period of growth

Strawberry growers have found, he said, that plants irrigated in the fall when the blossoms are forming in the crown will show an increase of 20 per cent production

ROBERT METZLER,
Plant Manager
Reist Seed Co., Mt. Joy

Some clovers and some alfalfas are very tight, especially certified Buffalo alfalfa and certified Pennscott red clover

Pennscott clover prices to the grower dropped some in the past few years and many growers stopped producing seed We got what we could get, but if we sell out we can't get it replaced any more

We have enough DuPuits alfalfa to take care of our needs. The suppliers have reported that Certified Buffalo, Atlantic and Cayuga are all sold out

Grass seems to be in good supply but one thing that could tie up orchard grass, especially S-37 is the boat strike.

Summer and fall seedings is where we are going to have our trouble I believe there is enough seed around for spring seeding We have an exceptionally good supply of Vernal alfalfa, and I think it will do better than Buffalo We got a good buy on it and we bought twice as much as we normally do

We handle open formula seed corn, and there seems to be plenty of that around Bookings are about the same as this time last year

In a business session, several growers charged that contract sprayers for railroads, public utilities and highway departments have caused considerable damage to vegetable and fruit crops by "misusing herbicides."

The state vegetable group, headed by Paul Rowe, Strasburg R1, named a committee to instigate legislation should the practice continue

The conference also heard reports on direct seeding of tomatoes, vegetable nutrition, peat pots, insect problems, marketing, pesticides and a new plastic mulcher.

Two Promotions Announced By Hoffman Seeds

M T Kauffman 154 Church Street, Landisville, has now been placed in charge of Funk's G-Hybrid seed corn activities at the Landisville seed concern He has worked for Hoffman for 27 years He assisted in some of the earliest hybrid seed corn testing in Pennsylvania, starting in 1936, and helped produce the first commercial crop of hybrid seed corn in Pennsylvania in 1939 He will contract for the production of all hybrid corn supplies for Hoffman and coordinate Hoffman's relations with the many other Funk's — G Associate Growers who operate over all the most important corn-growing areas of the U S

Chris M Nissley, 658 N Pine Street, Lancaster, has been put in charge of "Hoffman Seed Man" sales He will direct the activities of Hoffman's several hundred farmer-representatives who sell all over Pennsylvania and into bordering states He formerly supervised these activities in 33 counties, having been active in sales work for Hoffman since 1938 Nissley is also serving at the present time as Vice-President of the Pennsylvania Seedsman's Association and Vice-President of the Pennsylvania Grassland Council.

M. T. KAUFFMAN

CHRIS M. NISSLEY

WINNER IN THE STATE FIVE ACRE Corn contest was Robert L. Gross, Manchester R1, York Co. Here on the right he shows the trophy to his father, Harold Gross. He planted Funks G-96 on 100 foot wide contour strips on May 20. The corn followed potatoes, wheat, clover-timothy and corn in the rotation. He plowed down 300 pounds of ammonium nitrate and 10 to 12 tons of manure with a moldboard plow to a depth of eight inches. The soil was prepared with a spring tooth harrow and a cultipacker. At planting he added 400 pounds of 10-10-10 per acre on the row and planted the seed two inches deep. The rows were 40 inches apart and the stalks were seven inches on the row, which gave him a population of 18,580 stalks per acre. He cultivated twice and sprayed pre-emergence with Atrizine. On October 19 he harvested 207.5 bushels per acre.

Ready-To-Serve Foods

Homemakers like heat-in-the-bag frozen foods, report Harold Neigh, Penn State extension specialist in consumer economics In a survey of homemakers, more than half of them trying heat-in-the-bag foods make repeat purchases. This is proof of their acceptance

The trend of Pennsylvania potato growers is to plant larger and larger acreages or none at all.

Leader's Council Elects Members

Ten members were elected to the executive board of the Lancaster County 4-H Leader's Council at the annual meeting of the group recently at Farm Bureau Cooperative auditorium, Dillerville Road

"The 4-H Parent and You (the leader)" was the topic for the main talk of the evening delivered by the Reverend Kirk Hudson, pastor of the Highland Presbyterian Church.

The 55 persons at the meeting were entertained by Mr. and Mrs. Aaron Landis who sang several songs

Those elected to the executive board were as follows:

Agricultural representatives — Mrs. Dorothy Fry, Stevens R1, northeast district; Melvin Long, Lititz R3, northwest district; Wilbur Houser (reelected), Lampeter, southeast district; Edgar Porter, Washington Boro R1, southwest district, and Daniel Trimble (reelected), Quarryville R1, southern district

Home economics representatives — Mrs Herbert Royer (reelected), 2025 Oregon Pike, northeast district, Mrs Jean Thomas (reelected), Manheim, northwest district, Mrs Raymond Denlinger, Strasburg, southeast district, Mrs Edgar Porter, Washington Boro R1, southwest district, and Mrs John Stonel, Quarryville R1, southern district

Remove Non-Layers

Some non-layers may show up in the pullet flock a few months after they start laying, and Carl O Dossin, extension poultry specialist, says poultrymen must decide whether to sell these birds or keep them with the hope they'll come back into profitable production If houses are overcrowded, and non-laying birds are few, market those that have stopped laying

VERNE MARTIN, RETIRED SALES Manager of the Maytag Corporation, Newton, Iowa, was the main speaker at the annual sales meeting and banquet last week of the Rohrerstown feed firm of Miller and Bushong. Martin, left, outlined the sales approach that took the Maytag organization from a dealership of approximately 1,400 to 15,000 during the time he was sales manager. With Martin, at the meeting in the Host Motel, are, left to right; Chester Graybill, president of the firm; Robert Graybill, Vice President and General Manager, and Allen Graybill, Vice President and Treasurer.

Ag Extension Schedules Dates

The Lancaster County Extension Service this week released a list of dates of coming events hoping that rural residents might mark their calendars and reserve the dates of the scheduled meetings

The meeting dates are as follows

February 1, 4-H Baby Beef Banquet, Penn Manor High School 6 30 p m , February 12, Annual Extension Meeting, Hotel Brunswick, 6 30 p m ; February 27, Crops and Soils Day, Guernsey Sale Pavilion, All day meeting, March 5, County Dairy Day, Guernsey Sales Pavilion, All day meeting; March 6, Market Hog Show, Union Stock Yards, All Day; March 7, 8, District Swine Clinic Hostetter's, Mount Joy, Two days, March 13, Cattle Feeders Day, PLACE TO BE ANNOUNCED LATER, All day, March 18, Custom Sprayer Meeting, Singer's, Ronks, 7 30 p m : March 19, Corn Growers Meeting, Landisville Fire Hall, 7 30 p m , April 1, Sheep Producers Meeting, Farm Bureau Building, 8 00 p m.

Protect Machinery

Farmers and farm machinery owners who don't have enough storage space under roof can still protect their machinery from bad weather, says Burton S Horne, Penn State extension agricultural engineer Tillage equipment, such as plows, disks, harrows and cultivators can be stored out of doors after they are cleaned and painted Metal parts that work in soil should be coated with a rust preventive Then cover them with plastic sheeting which provides satisfactory storage until they can be placed under roof

The ears of the cricket are in his legs and a snake hears through his tongue

Be sure to water evergreens fall and winter Much winter injury is due to insufficient water in the fall and winter.

Your P-A-G dealer can tell you more about a

do-more HYBRID TEAM for your farm

From throughout the county we are hearing new reports of P-A-G's do-more performance. We are ready to tell you all about them. Chances are we can even tell you how P-A-G hybrids are doing for farmers you know. And we'll be glad to explain how P-A-G can break corn-growing bottlenecks on your farm. From P-A-G's big family, we can help you select the varieties best suited to your farm and then show you how they can be tailored into a hybrid team that will solve your corn-growing problems and boost your total income from corn. See us soon! Be sure to ask about P-A-G's spectacular SX hybrids, too.

For the Farm Wife and Family

Happy Entertaining!

By Mrs. Richard C. Spence

February is a short month but it boasts several good holidays, two of which seem to be special favorites—Valentine's Day and Washington's Birthday. Red and white seem to be the favorite color schemes for these two days.

Valentine's Day is the time to take out all the heart-shaped molds you have, use them for cakes and cookies and also for salads. Here is a recipe for an ice cream tart that can be used for either holiday.

SWEETHEART ICE CREAM TARTS

- ⅓ cup shortening
- 1 cup sifted flour
- ½ teaspoon salt
- ¼ cup finely chopped maraschino cherries
- 1 to 2 tablespoons maraschino cherry juice

Vanilla ice cream
Whipped cream

Maraschino cherries, stem on

Sift flour into bowl with salt Add well-drained, chopped cherries. Cut in shortening, using a pastry blender or fork until the mixture is the consistency of corn meal and small peas. Sprinkle cherry juice, a little at a time, over different parts of the flour-shortening mixture. Toss together lightly with a fork. Use as little liquid as possible, just enough to make dough hold together. Place dough on waxed paper Knead 3 times. Press gently into a ball.

Let stand at room temperature for 15 to 20 minutes. Lightly flour pastry cloth or board and stockinette covered rolling pin. Roll dough about ⅛ inch thick. Cut into circles. Place over outside of heart-shaped molds Trim edges to fit mold Prick with fork. Bake in a very hot oven (450 degrees) about 10 minutes, or until lightly browned Cool. Fill baked shells with vanilla ice cream. Top each with whipped cream and a cherry Makes 4 tarts or one 8-inch pie.

FRENCH CHERRY DESSERT

- 2 cups corn flakes or ½ cup corn flake crumbs
- 3 tablespoons confectioners' sugar
- ½ cup sifted flour
- ½ cup butter or margarine
- ¼ cup sifted flour
- ½ teaspoon baking powder
- ¼ teaspoon salt
- 2 eggs, well beaten
- 1 cup sugar
- 1 teaspoon vanilla flavoring
- ½ cup chopped nutmeats
- ½ cup flaked coconut
- ½ cup maraschino cherries, halved, drained

If using corn flakes, crush into fine crumbs. Combine confectioners' sugar, flour and corn flake crumbs in mixing bowl. Cut in butter until mixture resembles coarse corn meal. Press into bottom of 8 x 8-inch baking pan Bake in moderate oven (350 degrees) about 25 minutes or until lightly browned

Sift together flour, baking powder and salt. Blend eggs, sugar and vanilla. Stir in sifted dry ingredients. Fold in nutmeats, coconut and cherries. Spread over baked crust. Bake in slow oven (325°) about 40 minutes or until done. Cool. To serve, cut into squares and top with whipped cream or ice cream, if desired. Makes 9 servings.

Two salads to serve for a February party:

FEBRUARY'S BLUSHING HEART SALAD

First Layer:

- 1 package (1 pound) frozen raspberries, thawed
- 2 cups (1 pound can) fruit cocktail
- 1 tablespoon (1 envelope) unflavored gelatin

Drain raspberries thoroughly to obtain one cup juice; set aside. Drain fruit cocktail, reserving juice separately; set aside. In a saucepan combine ½ cup raspberry juice, ⅔ cup fruit cocktail and gelatin; heat until gelatin is dissolved Add raspberries and fruit cocktail, chill until mixture mounds. Place heart-shaped cooky cutter in center of mold; pour fruit mixture around cutter, chill until set.

Second Layer:

- 1 tablespoon (1 envelope) unflavored gelatin
- 1 cup small curd cottage cheese
- 1½ cups dairy sour cream
- ¼ teaspoon salt
- 2 drops red food coloring

In a saucepan combine remaining ½ cup raspberry juice and gelatin; heat until gelatin dissolves. Add cottage cheese, sour cream, salt and food coloring; chill until mixture mounds. Remove cooky cutters from mold; pour cottage cheese mixture into heart shaped space and over the entire first layer; chill until firm. Uumold on chilled serving plate; garnish with salad greens.

BUTTERMILK CHERRY HEARTS

- 1 can (1 pound-4 ounces) frozen cherries, thawed
- ¼ cup cherry juice
- ½ cup orange juice
- 1 package (3 ounces) cherry-flavored gelatin
- ½ cup sugar
- 1 tablespoon lemon juice
- ½ teaspoon almond extract
- ¾ teaspoon salt

For The Farm Wife

(Continued from Page 8)

1½ cups buttermilk
1 cup finely chopped celery
⅓ cup chopped almonds

Drain cherries, reserving juice. In a saucepan combine cherry juice and orange juice and heat; add gelatin and stir until gelatin is dissolved. Add sugar, lemon juice, almond extract, salt and buttermilk; blend thoroughly. Chill until jelly-like in consistency. Blend in cherries, celery and almonds; spoon into molds. Chill until firm; unmold on chilled serving plate and serve with Fluffy Orange Salad Dressing.

Fluffy Orange Salad Dressing:

2 tablespoons flour
¼ cup sugar
½ cup orange juice
1 egg yolk, beaten
1½ tablespoons lemon juice
¾ cup whipped cream

In a saucepan combine flour and sugar; blend in orange juice. Cook over low heat, stirring constantly, until mixture thickens and loses starchy taste. Add small amount of hot mixture to egg yolk; return all to pan and cook 1 minute. Remove from heat; stir in lemon juice. Chill. Just before serving whip cream until stiff. Fold into cooked mixture.

If you are serving either of the above salads as a luncheon special you might like to serve scones an an accompaniment. These could be made ahead and reheated when ready to serve.

SCONES

2 cups sifted enriched flour
¼ cup sugar
1 tablespoon baking powder
1 teaspoon salt
⅓ cup shortening
2 eggs
¼ to ½ cup milk
2 tablespoons sugar

Sift together flour, ¼ cup sugar, baking powder and salt. Cut or rub in shortening until mixture is crumbly. Beat 1 whole egg and 1 egg yolk together, reserving 1 egg white for the top. Blend together ¼ cup milk and beaten eggs. Add to flour mixture, stirring until flour is moistened. Add more milk, if necessary, to make a soft dough. Turn out on lightly floured board or pastry cloth and knead gently 30 seconds. Roll out to 8-inch square. Place on ungreased baking sheet. Cut into 12 squares. Beat egg white until frothy and brush top of dough. Sprinkle with 2 tablespoons sugar. Bake in hot oven (425 degrees) 12 to 15 minutes. Makes 12 scones.

SCOTCH SCONES: Stir ¼ cup currants into flour and shortening mixture. Proceed as with basic recipe.

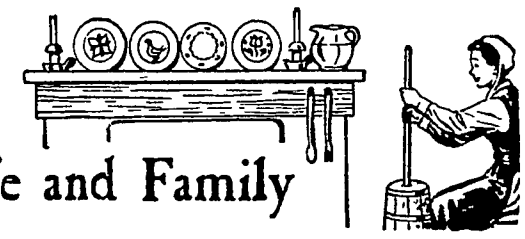
FRUIT COBBLER: Place 3 to 4 cups peeled sliced fresh fruit in bottom of 8-inch square baking pan. Combine ¼ cup sugar, ⅓ cup water and ½ teaspoon cinnamon and pour over fruit, (Or use two 12-ounce packagees frozen fruit or two 1-pound cans fruit. Drain and reserve ⅓ cup syrup. Omit water and reduce sugar to 2 tablespoons.) Prepare basic scone dough. Roll out to 8-inch square and place over fruit. Proceed as for Basic Scones, baking 20 to 25 minutes. Makes 8 to 10 servings.

Some sparkling punches to serve at your party:

CRANBERRY COOLER

½ cup fresh lemon juice
1 cup fresh orange juice
1 pint bottle cranberry juice cocktail
1¼ cups sugar
4 cups ice water or chilled sparkling water
Lemon slices

Combine lemon juice, orange juice, cranberry juice and sugar, stir until sugar is dissolved. Add ice water or chilled sparkling water. Pour in ice-filled pitcher or punch bowl; garnish with lemon slices. 16, 4-ounce servings.



For the Farm Wife and Family

Ladies, Have You Heard? . . .

By: Jane Thurston, Extension Home Economist

Clothing For The Handicapped

THURSTON

. Slacks made of stretch fabrics are fine for handicapped women. Clothing specialists point out that stretch-fabric slacks bend with the body and don't restrict exercising. Slacks of stretch fabrics prevent a woman from becoming overtired from sitting for long periods of time. Stretch-fabric slacks may be styled with tapered legs, and this is a safety feature for the handicapped woman.

Reminders Worth Noting

Wax your snow shovel and save both energy and exasperation when it's time to shovel snow. Apply a new coat of wax whenever the snow begins to stick to the shovel.

Pork shoulder steaks are just as easy to prepare as pork chops and they're likely to have a lower price mark. You can braise pork shoulder steaks just as you would pork chops—in barbecue sauce, sour cream, tomato juice, orange juice, or bouillon.

If you have a velvet dress that needs perking up, here's a tip—put hot water in the bathtub and hang the garment over the tub to steam for a half hour. Don't get water on the fabric. Brush the pile upward when the fabric is dry. Be sure the velvet is completely dry before wearing the garment.

In pork, you'll find sausage meat, smoked picnics, pork hocks, shoulder steaks and roasts, and end-cut loin roasts and chops are possible on reduced budget menus.

system, and electrical system. Fuel economy, with the factors that affect slippage and improper carburation, will be next on the list of studies This series will be followed by lubrication and the proper use of various kinds of grease and oils

During the entire program, safe handling of machinery and fuels is stressed, McGahen pointed out. Such things as filling the tractor fuel tank only when the machine is cold and not running, repairing leaks in the system as soon as they are noticed and taking care not to over-flow the tank are stressed.

The thing I have noticed most is that the boys wait too long to bring the machinery in, McGahen says. They wait until the tractor is in bad shape, and then it takes a lot of work to put it back in top notch order He believes this a common failing among farmers. "I tell the boys, 'the best time to fix a leak in a fuel system is yesterday, and the next best time is right now ' " McGahen says.

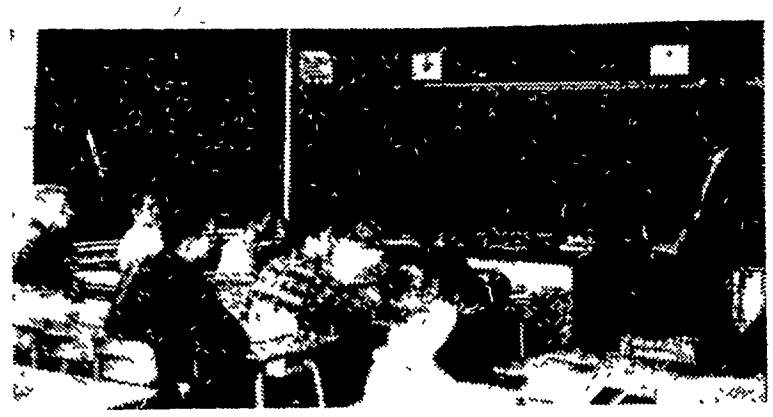
Right now, the big push is on painting tractors, he says, but the shop program includes many other phases of farm shop practices.

During the first week of the school year, the seniors began their program with general shop organization and shop safety. Since that time they have studied farm electrical system and each boy has been required to wire four boxes, a switch, a receptacle and lights Later in the year they will consider farm building construction and each boy will learn to stake out a building, set the footer and lay a wall of concrete blocks. Each student will prepare a bill of materials for a 14 x 26 foot farm building.

Coupled with the two double periods of time in the farm shop, each of the students spends three double periods in classroom work learning the newest and most advanced general farm practices.

When spring planting time does come, the tractors in the Manheim area will be ready to roll, and the boys will be ready to operate them safely and with efficiency.

The Mayflower was 90 feet long, 26 feet wide at the widest part, and drew 11 feet of water.



CLASSROOM INSTRUCTION IN FERTILIZERS and soil conditioning are a part of the vocational agriculture program at Manheim Central High School. Teacher of vocational agriculture, Harold McAllister, far right, explains the meaning of the large numbers on a fertilizer bag to a class of farm boys. The students, left to right, are John Swanger, Steven Sites, Raymond Myers, Kenneth Siegrist, James Gehman, David Sauder, Joseph Russell, David Enterline, and Jay Hershey, L. F. Photo

Be A Better Shopper

Among the rewards for being a better shopper are a balanced budget, more quality for the money, and better living for the family, say Penn State extension home economics specialists.

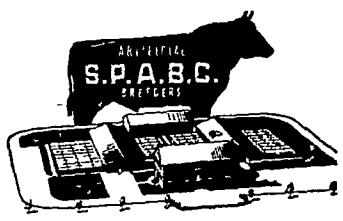
The annual per capita consumption of candy in this country is a littel more than eighteen pounds.

Production of vegetables for the fresh market in 1962 totaled 213.4 million hundredweight.

PRODUCTION--

The production level your herd achieves depends primarily upon the quality of Sires you select.

WITH



you choose the Sires' best suited for your Herd.

Speaking of Pullets

MANAGEMENT IS IMPORTANT

In large measure, flock performance depends upon the development of a bird's MAXIMUM EGG LAYING CAPACITY. Proper management of GROWING PULLETS is one of the most important principles contributing to success.

Other equally important factors include: good breeding, good feeding and adequate sanitation.

For a sound, successful RECORD PRODUCING* program which will raise your pullets at a surprisingly reasonable cost

attention all farmers who grow corn: SEE THE GEIGY FARM SEMINARS ON TV

...a series of four 30-minute informative panel discussions on advanced farming techniques in the Corn Belt.

A different topic will be discussed each week – a different panel will participate for each program. Panel members are selected for their experience and special knowledge or accomplishments within the Seminar topics of minimum tillage, management, soil and weed control. Participating will be county agents, agricultural research and extension personnel, professional farm management and credit specialists, and leading farmers representing different types of farming operations.

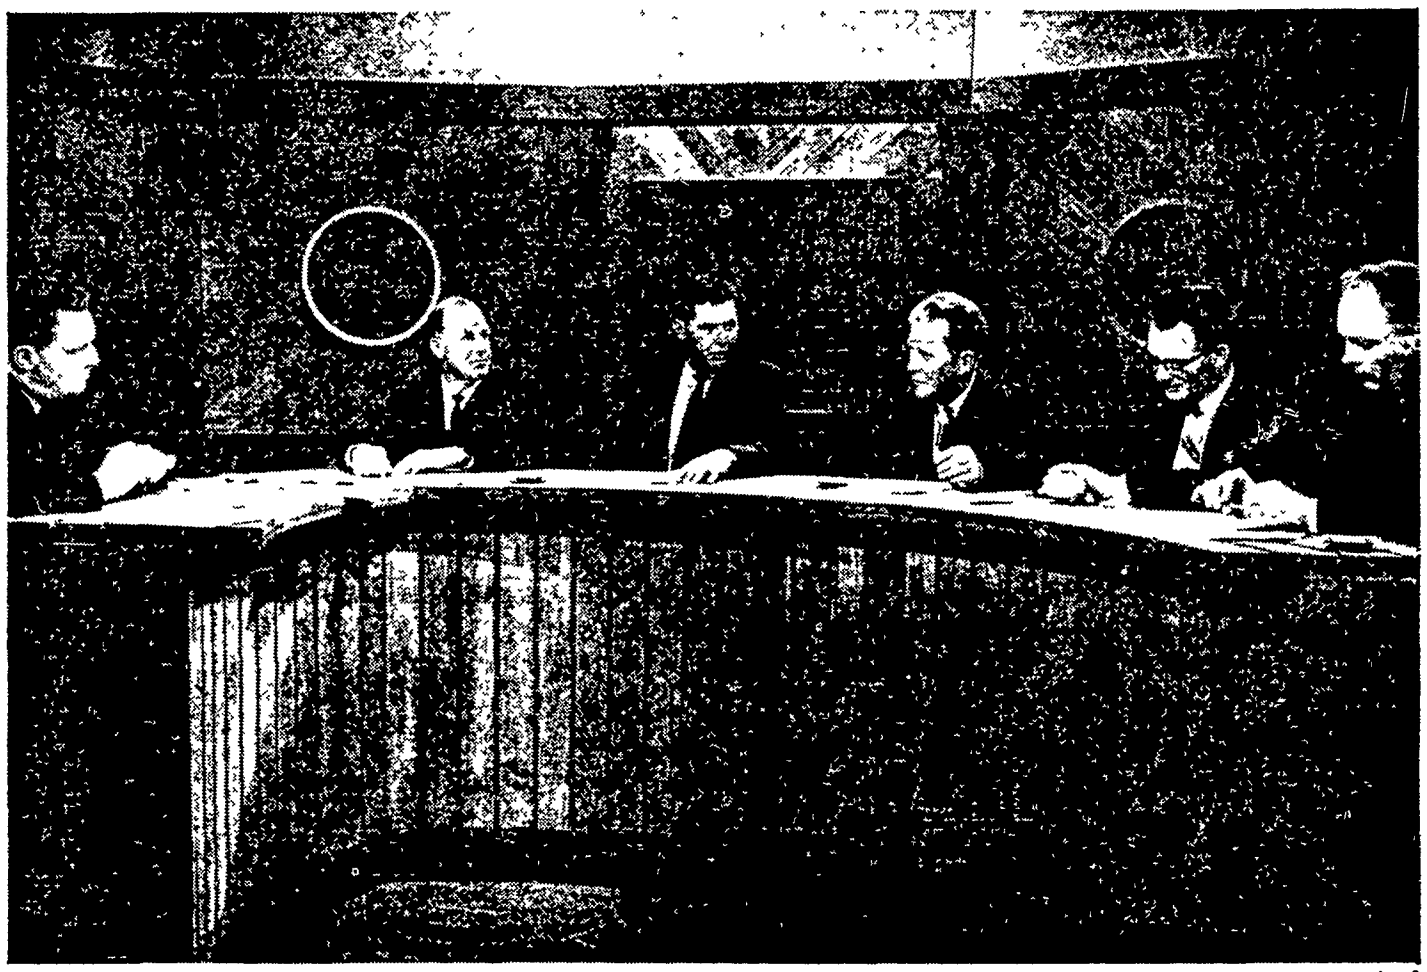
Geigy Creators of chemicals for modern agriculture

★ FIRST GEIGY FARM SEMINAR — Minimum Tillage

★ SECOND GEIGY FARM SEMINAR — Management

★ THIRD GEIGY FARM SEMINAR — Soil

★ FOURTH GEIGY FARM SEMINAR — Weed Control



Panel for Geigy Farm Seminar on the subject of Weed Control. Reading from left to right. Moderator, John F. Lewis, Dr Stanford Fertig Professor of Agronomy at Cornell University; Farmers—Robert Muirhead, Jr., Walter Nelson, Michael Behr; and County Agent Bert Olson.

Seminar to run every week for four weeks... Same time and channel The series will start on most stations with a telecast of the first Seminar sometime during the first week in February. The second Seminar will be presented the following week at the same time and on the same channel; and the third and fourth Seminars in similar sequence. Every farmer will want to see and hear this challenging and provocative series of educational programs dedicated to more efficient farming techniques.

John Esh Herd Has DHIA High Average

The 23 registered Holstein cows in the herd of John E Esh Gordonville R1, ha dthe highest monthly butterfat average in the Red Rose Dairy Herd Improvement Association during the December testing month

The herd averaged 69 pounds of butterfat in 1,824 pounds of milk with a 3 8 per cent test

Second high in the butterfat averages were the 24 registered Holstein cows in the herd of Jacob K Stoltzfus, Honey Brook R1 This herd averaged 68 pounds of butterfat in 1,717 pounds of milk with a 4 0 per cent test

The high lactation completed during the month was 25,610 pounds of milk with a 3 5 test for 890 pounds of fat made by a registered Holstein in the herd of Richard Landis, 2306 Horseshoe Road, Lancaster

Second high lactation was made by a registered Holstein owned by Earl L Groff, Strasburg R1 She made 818 pounds of butterfat in 20,206 pounds of milk with a 4 0 test Both lactations were on a 305 day basis

No other cow in the association made over 800 pounds of fat in her lactation ending during the month Registered holsteins in three other herds made over 750 pounds of butterfat Henry Kettering had a cow which made 759 pounds of fat in 16 445 pounds of milk A cow in the herd of Ezra Martin made 752 pounds of fat in 17 746 pounds of milk, and Leon W Hess has a cow with 752 pounds of fat in 15,793 Sixteen other cows had lactations over 700 pounds of fat

The herds of Elam B Beiler, Dan S Stoltzfus and Earl E Martin had averages 66 pounds of fat during the month Ten other herds in the association had 60 pounds of fat or better

---

The ideal age for children is when they are too old to need a baby sitter and too young to drive the family car.

Nat'l Contest Is Won By County Resident

Amos E Glick 2061 Jarvis Road, Lancaster, Pennsylvania was one of 50 winners in the nationwide Purina Calf Sweepstakes conducted by the Ralston Purina Company of St. Louis Missouri

Thousands of entries were submitted in the sweepstakes Each participant was required to fill in an entry blank from a dealer's store and mail it to Purina headquarters at St Louis

The winning names were drawn from all the entries by George Nichols, assistant secretary of the National Association of Artificial Breeders, Columbia, Missouri

Each winner received a pure bred heifer calf of the breed of their own choosing

---

All of Europe combined does not have as many species of native trees as does the Great Smokies National Park.

County Man To Speak At Conclave

A county man has been selected to speak at a Power Farmong Conclave in England later this month

V L Schreiber, 47 N Kinzer Ave New Holland, product development manager at the New Holland Machine Company, will speak at the conclave in Cheltenham, England, February 13 and 14.

Schreiber will be one of the featured speakers at the meeting. His talk will be on mechanical handling and feeding home grown feed.

Before joining the staff at the New Holland Machine Company in 1948, Schreiber was a school teacher and school principal.

Farm Women 4 Hear Lecture

Society of Farm Women four heard a talk on "The Entertaining Hostess" at a recent meeting in the home of Mrs Alvin Musser, Columbia R2. Speaker was assistant County Home Economist, Miss Jane Thurston

Thirity one members answered roll call by relating blizzard experiences with some of the experiences dating back to 1917. Mrs. Paul Metzger was in charge of devotions.

Mrs. Richard King and Mrs. Henry Heistand, delegates to the state convention in Harrisburg, reported on the meeting

The next meeting will be held Saturday, February 23, at 2 p.m. in the PP&L building, Columbia.

Each traffic death costs the community about $90,000 in lost income plus other incidental expenses — and there are about 100 such deaths daily.

True cashmere comes from the Kashmiri goats, from Tibet.

Changes Seen In Egg Picture

The Egg industry continues to undergo changes, Kermit Birth, Penn State Market specialist said this week In a report called Poultry Marketing Information Outlook, Birth said these changes continue to exert pressure toward increased production and lower prices

Continued emphasis is being placed on methods of reducing costs and improving income in order to meet competitive pressures both in production and marketing

U S egg production for 1963 may exceed slightly the production of 1962 Production in the first half of the year is expected to be slightly below the year earlier levels because the increase in the rate of lay is not expected to offset the reduced number of layers on farms Potential layers on farms the first of December were 1 per cent below the corresponding period a year earlier

Egg prices may average the same to slightly higher the first half of 1963 for both the U S and Pennsylvania Birth said

Egg production in Pennsylvania has declined since the peak was reached in 1955, and it appears that production in Pennsylvania in 1963 will be about the same as a year ago.

A smaller state laying flock the first half of the year may be offset by an increase in flock size later in the year Although the hatch in February and March fell below a year ago, the 11 month total was 6 per cent more than the same period a year ago But, in July through November the hatch was up 38 per cent

In the U S , the hatch of egg type chicks, January through November was down 5 per cent In the period July through November the hatch was up 2 per cent.

In the last quarter of the year the national laying flock is expected to be larger than in 1962.

The size of laying flock and egg prices the last half of the year will be influenced by the size of the hatch the first part of 1963. The size of the hatch will be influenced by prices the early part of the year

Some of the chicks hatched for flock replacement will be needed to replace the increased proportion of hens now on farms More pullets grown next year than needed to replace culled hens suggests a lower price level than that of the last quarter of 1962.

Demand for eggs is likely to continue to decline At the present time, nothing indicates a reversal in the downward trend in per capita consumption Thus an increase in production will result in lower prices Birth suggests poultrymen keep abreast of chick hatch for laying flock replacements

● Water Study

(Continued from Page 1)

dent of the Conestoga Valley Association, Charles S Conrad Lancaster County Planning Commission member and Commission Liaison Representative to the Committee and C Bickley Foster, County Planning Director Mr Fuehrer reported to the Commissioners that concluding the meeting in Ephrata was a motion which was unanimously adopted stated as follows

"That the County Commissioners be requested to provide for a Comprehensive Water Resources Study which will consider the impounding of water for public supplies, recreational uses and flood control throughout Lancaster County and which will provide implementation and estimates on structures, stream bank planting and reforestation as generally outlined in the Lancaster County Planning Commission's Water Resources Advisory Committee report and integrating assistance that can be secured from other governmental agencies provided such assistance does not create a hardship or serious time lag"

Mr Isaac H Weaver, Chairman of the Water Resources Advisory Committee, expressed gratification over the action of the County Commissioners He said that the Committee will meet on February 13, 1963 to begin more detailed discussions on undertaking the study "We want to avoid any duplication of costs and effort,' Mr Weaver stated, 'and we will look into any State and Federal surveys which relate to our water problems'.

The Susquehanna River Basin Study is just getting underway by the U S Corps of Army Engineers and will take many years to complete The U S Geological Survey office has begun a five year survey of underground water quality and quantity for a small section of the limestone area of Metropolitan Lancaster The State proposed Project 70 if passed by a referendum of voters in November 1963 would provide, among other things money for park areas related to sources of water Other members of the Committee are Samuel S Bard of East Petersburg, Frank H Feagley of Lancaster Township Earl L Grott of Strasburg, H C Kreisle of Lancaster; and Dr John H. Moss of West Lampeter.

● Jack Grey

(Continued from Page 1)

wide range of agricultural activities and has worked with farm organizations throughout the State. He is Executive Secretary and Treasurer of the Pennsylvania Horticultural Council, an organization embracing fruit and vegetable growers, food processors, nurserymen and flower growers

Grey is a member of the Governor's Committee on Migratory Labor, has had charge of program on the Statewide Farm-City Week Committee, and has been active on the Statewide Youth Power Congress Planning Committee.

He and Mrs. Grey, the former Emily Kelly, daughter of Louis Kelly, Altoona, have four children, Jack, Jr., 16; James, 14; Janice 10, and Jonathan, 3.

● Vegetable Growers

(Continued from Page 1)

University, Fred Wright, Kingston, was reelected vice president for his second term.

Named to the board of directors were H Herman Hostetter, Sinking Spring; Clair Allison, Hanover R3; Boyd Mertz, Northumberland and Ray Hetherington, Ringtown.

The meeting was held in cooperation with the Pennsylvania Canners Association and the Penn State Extension Service.
